BEST- EVER CLOUD & DATA CENTER SOLUTIONS

Bsoft Data Center Services delivers a highly secure, protected, and environmentally controlled facility for you to store critical data, network, and communications assets. Simplify your IT structure with a platform that can also virtualize your business

builds upon these essential ingredients with a full spectrum of professional support services – including Advanced Monitoring, Data Backup and Restoration, and a variety of Cloud Infrastructure Solutions.

CLOUD HOSTING SOLUTIONS

BUSINESS CONTINUITY

MANAGED SERVERS

FLEXIBLE CONFIGURATIONS SCALE WITH YOUR BUSINESS

Cloud and Data Center Solutions are flexible and secure to easily complement your existing architecture, as well as support a seamless transition (fully or partially) to cloud computing. No matter what the size or complexity, our robust portfolio of both traditional and cloud-based solutions offer a variety of advanced networking and cloud computing environments to suit your business requirements.

- ★ Virtual Private Servers
- ★ Dedicated Servers
- ★ Managed Hosting Servers
- ★ Data Backup & Recovery
- ★ Managed Storage
- ★ Hosted Email Solutions
- ★ Hosted Exchange
- ★ Server Co-location

VIRTUALIZATION & INTEGRATED SOLUTIONS

- ★ Pay-as-you-go scalability
- ★ Managed solutions enhance operational efficiencies
- ★ Easily manage growth & capacity fluctuations

BUSINESS CONTINUITY & RISK MITIGATION

- ★ Establish redundancy or diversity
- ★ Mitigate security risks
- ★ Perform data backup & recovery

ADVANCED ENTERPRISE-GRADE FEATURES FOR THE CLOUD

- ★ Virtualized & non-virtualized deployments
- ★ Integrate private networking using MPLS or other private networking solutions
- ★ Support input / output (I/O) intensive applications & storage replication

You have facility access 24 × 7, and our Smart Hands service personnel are optionally available to service and maintain your equipment on a regular or ad-hoc basis. In addition, weekly generator testing can reduce the risk of an outage. Installation, call-out, and crossconnect services are available to non-Bsoft India Technologies facilities, permitting diversification and provisioning of additional services.

WHEN FAILURE IS NOT AN OPTION.

Let's face it – IT is the lifeblood of your business. Big or small, global or local – your business relies on IT. And if it's not there, you're out of business. It's that simple. And that complicated.

It covers everything your company does: mission-critical applications, eCommerce infrastructure, back office systems, Software as a Service (SaaS) applications, Exchange servers and

ALWAYS ON.

At Bsoft India Technologies Pvt. Ltd. Hosted Solutions, we're all about uptime. 100% uptime at enterprise class data centers nationwide. We understand the technologies that keep your company running. Better still, we understand the business drivers behind your need for them. For more than a decade, we've provided industry-leading IaaS solutions to companies nationwide, ranging from start-ups to Fortune 500 enterprises. We live and breathe IT, and we'll design a solution that meets your needs. And we'll back it up with an army of experts and data centers, strategically placed around India & United States. Together, they're working for you with unmatched technical expertise and proven reliability. Every second. Every minute. Every hour of every day.

THE BSOFT INDIA TECHNOLOGIES HOSTED SOLUTIONS DIFFERENCE

Proven Track Record

- ▶ More than a decade of experience supporting leading companies, from startups to Fortune 500 enterprises
- ▶ 80+% of our customers host their production-level environments with us
- ▶ Carrier-neutral network with N+N redundancy
- ▶ All services delivered with guaranteed uptime and Legendary supportRange

Range of Managed Cloud and Dedicated Servers

Cloud

- ▶ Public / Private / Hybrid Storage
- ▶ Disaster Recovery as a Service (DRaaS)

Dedicated

- ▶ Dedicated Servers
- ▶ Switches / Firewalls / Load Balancing

Flexibility

- ▶ Ability to integrate with your existing environment, serving as an extension of the internal IT team
- ▶ Experience with public/private/ and hybrid environments, disaster recovery, managed hosting services, and colocation
- ▶ Wide range of services enables us to grow with you as your needs evolve

Managed Hosting

- ◆ Managed Remote Backup
- ◆ Content Delivery Network (CDN)
- ◆ OS / Middleware / Database Management
- ◆ Unified Email Management
- ◆ Hosted Exchange
- ◆ IT Consulting & Professional Services

SMART SOLUTIONS.

PERSONALIZED SERVICE.

You need more than space and power in a data center. You need the knowledge of people who understand your company's unique needs, and who are capable of designing a solution that meets them. Bsoft India Technologies Hosted Solutions takes that personalized approach, delivering an invaluable combination of business acumen and technical expertise together with an uncommon level of flexibility.

It starts with our team of expert engineers and solution architects, who'll work with you to customize a solution to meet your company's specific requirements. We'll use industry-leading technology from companies like VMware, HP, EMC, NetApp, VCE, Cisco and more, ensuring you get the level of performance you need and expect at every step.

Once your system is up and running, we'll deliver three tiers of support personnel who'll know your company and work with you, monitoring your environment and ensuring that your company's IT infrastructure is protected.

Our personalized approach is the reason more than one thousand companies, all the way from small companies to Fortune 500 enterprises, rely on Bsoft India Technologies Hosted Solutions to protect their mission-critical infrastructure and data. Yes, we deliver service. But we also deliver peace of mind. It's a great combination.

EXCEPTIONAL PROTECTION FOR YOUR DATA & WEB PRESENCE

DATA BACKUP & RECOVERY

- ▶ Electronic data backup services (magnetic disk)
- ▶ Central control panel to backup multiple servers with differing operating systems
- ▶ Automatic scheduling
- ▶ Backup copies of critical server data
- ▶ Data compression, de-duplication & delta processing

NETWORK FIREWALL WITH IDPS

- ▶ Internal user-only access to company Web pages & e-mail
- ▶ Geographically diverse & redundant Internet connectivity to all sites on your network
- ▶ Packet filtering, circuit-level gateways, application-level gateways or proxies & stateful packet inspection
- ▶ Intrusion Detection & Prevention System (IDPS), Web Anti-Virus, Anti-Spyware & Web URL Filtering

HVAC

- ▶ Precise control of temperature & humidity in the data center
- ▶ Consistent relative humidity regardless of the outside environment
- ▶ Environmentally friendly cooling towers & heat exchange
- ▶ Scalable HVAC systems, including

PHYSICAL SECURITY & ACCESS

- ▶ Card-reader & biometrics identity access
- ▶ Closed circuit cameras & digital video recording
- ▶ Grid of sensors & alarms
- ▶ 24 × 7 onsite expert technicians

CLOUD SOLUTIONS

- ▶ Card-reader & biometrics identity access
- ▶ Closed circuit cameras & digital video recording
- ▶ Grid of sensors & alarms
- ▶ 24 × 7 onsite expert technicians

COLOCATED CUSTOMER ASSETS

VIRTUAL SERVERS

- ★ Purchase on a per virtual server basis with only the compute & storage requirements needed for a particular application
- ★ Delivered using enterprise-caliber Servers
- ★ Integrate with MPLS & other private networking options
- ★ Ethernet inter-connect option for integration with dedicated or colocated servers
- ★ Full administrative access with options for OS management & patching

DEDICATED SERVERS

- ★ High bandwidth, secure connectivity
- ★ Dedicated network to support virtual, as well as, legacy applications
- ★ Managed Servers options to enable transition to virtualization at your own pace
- ★ Dedicated network to support virtual, as well as, legacy applications
- ★ Gain economies of scale without investing in additional hardware
- ★ Add incremental capacity as you need it
- ★ Integrate into your existing infrastructure without reworking security solutions

MANAGED STORAGE

- ★ Failover or replication solutions for business continuity / disaster recovery
- ★ Various performance tiers to support the demands of any application
- ★ Advanced Storage features, including automated storage tiering, enterprise-grade solid state (flash) drives & optional dedicated physical disks
- ★ Purchase additional capacity as you need it versus buying physical equipment
